Person 1 Checklist: Data Acquisition & Verification

Project: Public Catastrophic Crisis Briefing Assistant

Progress: 0 / 28 complete

Check all | Uncheck all

1. Scope Lock

- [ ] Scope restricted to data acquisition and verification only
- [ ] No summarization, briefing generation, or UI tasks included
- [ ] Deliverable defined as verified structured crisis information

2. Source Framework

- [ ] Official APIs and information sources integrated
- [ ] Source credibility framework documented (tiering/rules)
- [ ] Corroboration criteria for confirmed status finalized

3. Data Contract

- [ ] Structured schema implemented with required fields
- [ ] Timestamps captured for retrieval and publication
- [ ] Source attribution fields enforced for all records
- [ ] Status values restricted to confirmed, preliminary, unverified

4. Verification & Conflict Detection

- [ ] Conflicting reports are detected and explicitly flagged
- [ ] Numeric conflicts detected (casualties, injuries, displacement)
- [ ] Location/time contradictions detected and logged

- [ ] Each status decision has evidence notes

5. Quality Gates

- [ ] 100% records include source name, URL, and retrieval timestamp
- [ ] No record marked confirmed without policy-compliant evidence
- [ ] Pipeline output is reproducible with the same input snapshot
- [ ] Classification coverage complete across all records

6. Test Coverage

- [ ] Single authoritative bulletin scenario passed
- [ ] Conflicting multi-source scenario passed
- [ ] Rapid update progression scenario passed
- [ ] Uncorroborated rumor scenario handled as unverified
- [ ] Stale versus fresh source contradiction scenario passed

7. Submission Artifacts

- [ ] Verification policy document completed
- [ ] Data schema specification completed
- [ ] Decision logic and classification rules documented
- [ ] Test results matrix prepared
- [ ] Sample validated JSON output included
